12. Educational Aims of the Programme

Compassion and a commitment to the promotion and maintenance of human dignity are key concepts underpinning this programme. In design the course aims to prepare students for a dynamic work environment; an environment in which service user wellbeing is often dependent on integrated systems of health, care and welfare.

Building on work undertaken by students progressing from Level 4 and 5 this course offers a rich educational experience to support further academic and practitioner development. This Level 6 course of study enables students to demonstrate both independence and self-determination. The course is designed for those students who wish to extend their knowledge and capacity to influence, within the sector of health and social care.

The course aims to:

1. Develop competence for practice and practice management within sectors of health and social care.
2. Provide students with an opportunity to build on, and apply, existing experience and knowledge.
3. Promote critical understanding, debate and analysis of contemporary social issues and contexts related to health and social inequalities across the lifecourse.
4. Provide fora to evaluate and critically reflect on contemporary operational practice within the complex, multi-dimensional settings of integrated health and social care.
5. Critically engage students in contested moral, ethical, cultural, economic, social and political debates that frame integrated health and social care provision and policy.
6. Develop flexible, reflective practitioners capable of meeting the expectations and demands of person-centred care for individuals, groups and populations.
7. Enhance personal and professional development through advanced academic skills and digital citizenship.
8. Develop an analytical and critical approach to problem solving that promotes evidence based and reflective practice.
9. Develop transferable graduate skills which promote autonomous lifelong learning and an enjoyment and commitment to continuous professional development and capacity to appropriately challenge current practice.

13. Intended learning outcomes and learning, teaching and assessment methods

This is a vocationally focused course with classroom, and self-directed learning requirements. It is designed to enhance and develop a range of key transferable skills together with specific knowledge, skills and attitudes. The learning outcomes for the course reflect core knowledge and values that underpin professional development within health and social care and other related fields. These outcomes inform and govern the modules presented in Course Module Guides.

LO no.	On successful completion of the named award, students will be able to:	Module Code/s

Table 2 knowledge and understanding outcomes and which module/code they relate to

Knowledge and Understanding		
1	Critically evaluate contemporary issues in integrated health and social care by drawing on knowledge and theory in conjunction with personal and practitioner insight.	APHS3002 APHS3003
2	Critically evaluate health and social factors that can give rise to periods of transition and change across the life course.	APHS3003

Table 3 cognitive and intellectual skills outcomes for module code/s

Cognitive and Intellectual skills		
3	Critically investigate opportunities to provide support or intervention that improves health and/or welfare outcomes for individuals, groups and populations.	APHS3002
4	Advocate for the importance of a compassionate, person-centred approach to the achievement of positive outcomes for individuals and diverse populations within systems of integrated health and social care.	APHS3003
5	Evaluate the implications of complex challenges and dynamics when working with others to achieve positive outcomes for/with service users and their families.	APHS3003

Table 4 learning skills and capabilities related to employability outcomes for module code/s

Skills and capabilities related to employability		
6	Challenge health perceptions and advocate on behalf of individuals, groups and populations.	APHS3003
7	Critically appraise the contribution made by a range of stakeholders in meeting the complex needs of individuals, groups and populations.	APHS3003

Table 5 transferable/key skills outcomes for module code/s

Transferable/key skills		
8	Synthesise current research, policy, ethics, knowledge and understanding and apply to real-world situations.	APHS3002
9	Apply the principles of reflective practice to achieve self-efficacy and resilience in the workplace.	APHS3003
10	Communicate convincingly, concisely and clearly in order to articulate complex issues.	APHS3002 APHS3003

11	Demonstrate high standards of digital capability and information literacy for effective practice in integrated health and social care.	APHS3002 APHS3003
----	--	----------------------

Learning, teaching and assessment

Learning and teaching in the programme is designed to develop specialist knowledge, skills and attitudes relevant to practitioners working within the integrated health and social care sector. Peer-learning is a key component of this course, as students come from a wide range of disciplinary backgrounds, providing a rich learning environment. Additionally, students will be provided with opportunity to develop academic and transferable skills, which will contribute to their development as independent and autonomous lifelong learners.

Teaching

Knowledge, skills and attitudes will be developed through a variety of learning strategies including lead lectures, group work, case study analysis, role-play, practice analysis, development of reflective practice skills, experiential learning, e-learning incorporating the use of Blackboard and online library search tools, tutorial support.

Reflective practice is a key element within the learning and teaching strategy and facilitates the integration of theory with practice. Reflection provides students with the opportunity to examine their personal progress and development and to devise strategies for creating further development opportunities. In addition, developing insight can be critically enhanced through the consideration of theory, research and other significant evidence that stimulates reflection on practice. The importance of Personal Development Planning (PDP) is acknowledged and incorporated throughout:

- Accessible support mechanisms for engagement in PDP both within the course structure and through careers and other support offered by Student Services
- Opportunity to discuss their PDP with a tutor or advisor.

The University places emphasis on enabling students to develop [Graduate Attributes](#) that will equip them for lifelong learning and future employment, as well as academic achievement. A mixture of independent study, teaching and academic support from Student Services and Library Services, and also the Personal Academic Tutoring system enables students to reflect on progress and build up a profile of skills, achievements and experiences that will help them to flourish and be successful.

Contact time

Tutor support and Student and Library Services are available throughout the week and students are encouraged to schedule regular personal study at home using the university's extensive online support or on campus at the Hive or the Peirson Study and Guidance Centre.

In a typical week, students will have around 8-10 contact hours, including seminar, tutorial and small group activities. The dissertation module APHS3002 takes a blended approach and is taught through face to face and synchronous online sessions. In addition, students are allocated a supervisor for their Dissertation, and this important relationship is established early in the academic year. Students are encouraged to meet regularly for dissertation supervision, and it is usual for the supervisor / supervisee relationship to be maintained for the duration of the study. Work based learning is not a requirement for the Top-up Degree, but students are encouraged to work or volunteer within the sector as this helps link theory to practice and provides opportunities to explore 'live' challenges emerging in practice.

Independent self-study

In addition to the contact time, students are expected to undertake around 24 hours of personal self-study per week. Typically, this will involve preparatory independent reading and study directed by teaching staff prior to taught sessions, self-directed reading and other forms of study (e.g. watching video or listening to audio recordings) and independent research guided by the learning requirements for each module of study as determined by module learning outcomes.

Independent learning is supported by a range of excellent learning facilities, including the Hive and

library resources, the virtual learning environment, and extensive electronic learning resources.

Teaching staff

Students will be taught by a teaching team whose expertise and knowledge reflects the diverse nature of the integrated health and social care sector. Staff details can be found in the Course Handbook.

Teaching is informed by research and consultancy and lecturers are often experienced practitioners and practice managers prior to taking up teaching positions at the university. The majority of lecturers on the course have a higher education teaching qualification or are Fellows of the Higher Education Academy.

Assessment

The course provides opportunities to test understanding and learning informally through the completion classroom-based exercises or 'formative' assignments. Each module has one or more formal or 'summative' assessment which is graded and counts towards the overall module grade. Full details of formative assessment will be available at the start of each module. Assessment methods include essays, case study and analysis, individual presentations, reports and analytical paper.

The precise assessment requirements for an individual student in an academic year will vary according to the mandatory and optional modules taken, but a typical formal summative assessment pattern for the year of the course is:

Year 3

Case Study

Presentation

Summary Report

Essay

Independent Study

14. Assessment Strategy

Assessments are designed to assess specific knowledge, attitudes and intellectual and practical skills that underpin practice when working with service users. The assessment strategy is designed to meet the University's commitment to promoting inclusive assessment to enable all students to demonstrate their achievement of the course aims and outcomes. The strategy is designed to assist students with their personal and professional development by enabling them to identify and build upon their strengths and to identify and address areas for improvement. This will be achieved by formative and summative assessment and by acquisition of the skills and discipline required of a reflective practitioner.

Assessment and moderation strategies are designed to meet the requirements of the [University's Assessment Policy](#).

The course assessment strategy takes account of the fact that students often gain in confidence and skills during a period of study. Formative assessments that do not contribute to the student's grades are used to help focus the student on themes, knowledge and skills of particular importance to their development to help them confidently prepare for formal assessment.

15. Programme Structures and Requirements.

The course is single honours, modular and is designed to be studied, full or part-time.

To gain the BA award with honours 120 credits at Level 6 are required. Students must undertake a 30-credit dissertation.

To gain the BA award non-honours 60 credits at Level 6 are required. A Dissertation is not required but all other mandatory requirements must be met.

All modules are identified as mandatory (M) or optional (O). All mandatory modules are made available and must be completed successfully in order to achieve the award. **Optional modules will be available subject to demand.** Advice on module availability will be made available during the module selection process.

The modules for the BA (Hons) Applied Health & Social Care Top-up degree are presented in the table below:

Table 6 award map

Level 6					
Module Code	Module Title	Credits (Number)	Status Mandatory (M) Optional (O)	Pre-requisites	Co-requisites exclusions and other notes
APHS3002	Dissertation [30 credits semester 1 & 2]	30	M	APHS3011*	None
APHS3003	Person Centred Care Across the Life Course	30	M	None	None
APHS3022	Participatory Planning and Social Prescribing in Health and Social Care	15	O	None	None
APHS3009	Substance Misuse	15	O	None	None
APHS3010	Understanding Domestic Abuse	15	O	None	Exclusion APHS2005
APHS3012	Contemporary Issues in Mental Health	15	O	None	None
CAMH3008	Empowering and involving children & young people; children and young people's rights	15	O	None	None
CAMH3007	Promoting CAMH in universal settings	15	O	None	None

Single Honours Requirements at Level 6

Single Honours students must take 120 credits in total to include APHS3002 and APHS3003 plus 60 credits from optional modules.

A Non-Honours award will be made if the student completes 60 credits including the mandatory module APHS3003 Person Centred Care Across the Life course. A Dissertation is not required for the Non-Honours award.

16. QAA & Professional Academic Standards & Quality

This award is located at Level 6 of the [OfS sector recognised standards](#) and is constructed to enable students to demonstrate knowledge and competencies as detailed in [National Occupational Standards](#) and guidance provided by Sector Skills Councils: [Skills for Health; Skills for Care and Development; Skills for Care](#).

17. Support for Students

Induction

Induction for BA (Hons) Applied Health & Social Care Top-up degree will introduce students to course requirements and the range of facilities and support available to enable students to meet course demands; information sharing about student services, library resources, use of computer facilities, timetabling and access to teaching staff will form part of the induction process. The main focus for induction will be preparation for the student's Dissertation with guidance provided for completing a Dissertation Proposal.

To enhance the student experience and to ensure that students are aware and have access to the full range of academic and welfare support available a comprehensive range of measures are in place.

Within the course, support includes:

- Students will be issued with a comprehensive Student Handbook, and a Course Handbook. Handbooks are reviewed annually.
- All students will be allocated a Personal Academic Tutor on commencement of the course. In addition, module tutors will provide specific educational guidance.
- With support from tutors, students will identify learning and development needs and develop action plans to address the personal needs identified.
- Students will be supported by module tutors responsible for individual modules. Critical reflection and application of theory to practice will be an essential component of all modules.
- Blackboard, a feature of the university's eLearning provision, will be useful for students off campus to access a virtual learning environment and maintain contact with tutors and peers.
- Access to academic writing support with Writers in residence

One of the main ways in which students are supported on the course is through the University-wide Personal Academic Tutoring System. Personal Academic Tutoring (PAT) is at the heart of supporting personal, professional and academic development and tutors meet with their tutees throughout the year. These meetings may be held in group or individually at least four times a year and may be in person or online. PATs will 'signpost' students to the appropriate university support services as needed including Disability and Dyslexia support, IT, media and print services support, as well as a range of health and wellbeing support services such as student counselling service, financial advice and accommodation matters.

The following guidance and support structure is in place for students to answer all queries related to student life, including the Disability and Dyslexia Service:-

<https://www2.worc.ac.uk/firstpoint/>

<https://www.worcester.ac.uk/life/help-and-support/services-for-students/home.aspx>

<https://www2.worc.ac.uk/disabilityanddyslexia/>

18. Admissions

Admissions Policy

The University of Worcester seeks to admit students who have the capacity to benefit from study at higher education level, and Admissions Tutors seek to identify applicants who can demonstrate their potential to succeed at this level.

The admission of students is based on the reasonable expectation that the applicant will be able to fulfil the objectives and achieve the standard required for the award for which they are registered.

Entry Requirements

The current entry requirements for the [BA \(Hons\) Applied Health & Social Care Top-up Degree](#) are published on the University website and in the prospectus.

Students should have a Foundation Degree, DipHE, HND or equivalent qualification in a health, social care or related subject. A supportive academic reference is also required. Applications from candidates who can provide evidence of their ability to work at Level 6 with substantial experience of working within health, care or social welfare are also encouraged. Please see the University's [Admissions Policy](#) for other acceptable qualifications.

Recognition of Prior Learning

Information on eligibility for recognition of prior learning for the purposes of entry or advanced standing is also available from the University webpages or from the Registry Admissions Office (01905 855111).

Further information on Recognition of Prior Learning can be found on the university's [Registry Services webpages](#).

Admissions procedures

The current requirements for entry to this course are published on the University website:

[BA \(Hons\) Applied Health & Social Care Top-up Degree](#)

Full-time applicants apply through UCAS (5L28)

Part-time applicants apply through [University of Worcester Admissions](#).

Admissions/Selection Criteria

The University of Worcester welcomes applications from candidates from all social and ethnic backgrounds and is committed to the promotion of equal opportunities for all.

No student will be subjected to less favourable treatment on grounds of race, ethnic or national origins, colour, gender, sexuality, parental status, marital status, disability status, creed, political belief or social or economic background.

Support for disabled students can be negotiated through the Disability Co-ordinator who works from the [Disability & Dyslexia Service](#). Early contact is advisable to ensure appropriate levels of support from the outset of the student's course.

Typically, applicants will be able to evidence ability to support, offer guidance or provide care to others. Where applicants have limited or no prior experience they will be invited to interview where their appreciation of the challenges encountered in health and social contexts will be investigated.

A satisfactory Disclosure and Barring Service (DBS) check and occupational health check is not required prior to commencement of the course.

19. Regulation of Assessment

The course operates under the University's [Taught Courses Regulatory Framework](#)

Requirements to pass modules

- Modules are assessed using a variety of assessment activities which are detailed in the module specifications.
- The minimum pass mark is D- for each module.
- Students are required to submit all items of assessment in order to pass a module, and in some modules, a pass mark in each item of assessment may be required.
- Full details of the assessment requirements for a module, including the assessment criteria, are published in the module outline.

Submission of assessment items

- Students who submit course work late but within 7 days (one week) of the due date will

have work marked, but the grade will be capped at D- unless an application for mitigating circumstances is accepted.

- Students who submit work later than 7 days (one week) will not have work marked unless they have submitted a valid claim of mitigating circumstances.
- For full details of submission regulations please see the Taught Courses Regulatory Framework.

Retrieval of failure

- Students are entitled to resit failed assessment items for any module that is awarded a fail grade.
- Reassessment items that are passed are capped at D-.
- If a student is unsuccessful in the reassessment, they have the right to retake the module (or, in some circumstances, take an alternative module); the module grade for a re-taken module is capped at D-.
- A student will be notified of the reassessment opportunities in the results notification issued via the secure student portal (SOLE). It is the student's responsibility to be aware of and comply with any reassessments.

Requirements for Progression

- A student who, by the time of the reassessment Board of Examiners, has failed 90 credits or more (after exhausting all reassessment opportunities) during the academic year, will have their registration with the University terminated.
- If a student has not passed at least 90 credits by the reassessment Board of Examiners, the student will be required to retake the failed modules in the following academic year. Students will be able to carry forward any passed modules.

Requirements for Awards

Table 7 requirements for awards

Award	Requirement
Top up Degree (non-honours)	Passed a minimum of 60 credits at Level 6, including mandatory module APHS 3003 (Person Centred Care Across the Life Course) and not including the Dissertation module (APHS3002), as specified on the award map.
Top up Degree with honours	Passed a minimum of 120 credits at Level 6, including mandatory module APHS 3003 (Person Centred Care Across the Life Course) and APHS3002 (Dissertation) as specified on the award map.

Classification

The Honours classification is determined on the profile of the 120 credits attained at Level 6 only. Classification will be based on the weighted average grade together with a requirement for at least half of the Level 6 grades to be in the higher grade.

For further information on honours degree classification, see the [Taught Courses Regulatory Framework](#)

Please Note: The above method of classification applies to students entering the Top-up degree from September 2022 onwards.

20. Graduate Destinations, Employability & Links with Employers

In an environment of increasing complexity, fragmentation and uncertainty there is a requirement for new operational forms to emerge. This course anticipates greater integration of health and social care and is designed to prepare students for a constantly changing work environment. Employers increasingly require skilled, competent and resilient staff who can work flexibly, cope with uncertainty and yet maintain professional integrity and discipline.

A focus on multi-professional and multi-agency responses to issues in health and social care have informed the emerging context for this programme. In consultation with employers the course seeks to prepare students for future careers in a range of operational contexts as identified in the section Graduate Destinations below.

Graduate Destinations

Graduates are expected to seek employment working in statutory, voluntary and commercial organisations, with a small number of enterprising graduates starting their own businesses. Examples of the types of paid employment across health, social care and social welfare contexts include:

- Care leaver services.
- Advice and guidance services
- Advocacy and rights-based services
- Reintegration Work for offenders
- Preventative health, care and welfare services
- Housing support services
- Health care provision
- Social enterprise

On completion of the award further study can also be considered, including a [MA Social Work](#) (which may confer professional Social Worker status). Students are encouraged to apply for masters level study but places are not guaranteed.

Student Employability

Student employability remains a high priority which reflects both University aspirations and the vocationally focused nature of the course. The course will be constantly reviewed to ensure that it is fit for purpose and capable of equipping students to meet employment challenges.

Conditions in practice are difficult but evidence suggests that students graduating from similar programmes are competing favourably for employment and that a wider range of employers than ever before are recognising the contribution that effectively trained and knowledgeable practitioners can make to the achievement of their aims and goals.

Graduate employability will be tracked and monitored through Higher Education Statistics Agency data generated from the Destinations of Leavers from Higher Education survey.

Links with Employers

A range of service providers support courses within the School of Allied Health and Community and this course builds on those relationships.

Colleagues from the statutory, voluntary and the independent sector keep staff informed of the changing conditions in practice and this, combined with research and feedback from students, will influence the continuous development of this course.

Students and graduates of this course will benefit from the strong links to practice already established; experienced practitioners and service managers contribute to both taught aspects of the course and to a range of on-going quality assurance arrangements.
