

PROGRAMME SPECIFICATION – MRes History

This document applies to Academic Year 2020/21 onwards

1.	Awarding institution/body	University of Worcester
2.	Teaching institution	University of Worcester
3.	Programme accredited by	N/A
4.	Final award	PG Cert, MRes
5.	Programme title	MRes in History
6.	Pathways available	N/A
7.	Mode and/or site of delivery	Independent research with taught elements at the University of Worcester
8.	Mode of attendance	Full-time and part-time. Evening study may be required.
9.	UCAS Code	N/A
10.	Subject Benchmark statement and/or professional body statement	The programme is informed by Vitae's Researcher Development Framework and the QAA Master's Degree Characteristics (2020)
11.	Date of Programme Specification preparation/ revision	November 2015. July 2016 – regulations amended (Section 20). June 2017 – MHCA4002 module title changed. August 2017 - AQU amendments. July 2018 – general update and module title changes to MHCA4001 and MHCA4002. August 2018 – AQU amendments February 2019 – AQU amendments August 2019, AQU amendments to Section 19. August 2020 – AQU Amendments.

12. Educational aims of the programme

The principal aim of this course is to develop student's expertise in their subject and ability to apply fundamental research skills while offering a pathway from undergraduate study to an academic career. Students would gain this opportunity while working with and supporting nationally and internationally acknowledged experts in the History subject area. The MRes is also designed to offer transferrable and employment-related skills in, for example, project planning and management, time management, research and data analysis, digital literacy, and communicating complex ideas in writing. Lastly, the option of a PG Cert in Research could offer new members of staff and/or early career researchers an opportunity to develop research skills and research experience by means of the support offered through a structured programme.

This MRes' most distinctive feature is its 'apprenticeship' model. This allows the student to acquire research expertise in developing and executing their own project while working alongside experts in the specialisms of our History subject area. These areas include the Transatlantic Slave Trade, 'home fronts', remembrance, international history, and early modern history. The MRes offers, moreover, the opportunity to support, develop and contribute to those specialisms and to acquire experience both of working within an academic community and institution and of specific tasks (e.g. contributing to community engagement projects, or to various tasks connected to the support of existing research in the Department). With relatively little provision in the surrounding region for MRes study in History (particularly in the research specialisms named above) the course provides a unique opportunity empowering students towards a postgraduate career in their chosen field.

To summarise, the main aims of this course are to:

- support the transition from undergraduate to doctoral study.
- help students to develop skills in advanced methodology and collaborative research that could be applied to an academic career or other employment.
- develop knowledge and expertise in a particular field of study while working alongside nationally and internationally acknowledged subject experts.
- encourage students to think for themselves while developing a critical ability to analyse, interpret and communicate research data and published research.
- develop research methods and skills appropriate to the context and discipline of their research project.
- help students to develop transferrable project management skills including: independent working; being able to devise, research and execute a substantial research project; set goals, priorities and schedules; document, report and reflect back on progress; data analysis skills such as using electronic and online resources.
- facilitate the development of new members of staff and/or early career researchers.

13. Intended learning outcomes and learning, teaching and assessment methods

These learning outcomes are informed by the descriptor for a Master's degree set out in *The Framework for Higher Education Qualifications in England, Wales and Northern Ireland (FHEQ), 2008* and by the QAA Master's Degree 'Characteristics Statement' (published September 2015)

On successful completion of the programme students will be able to:	Examples of learning, teaching and assessment methods used:
PGCert	
1. critically evaluate current research and advanced scholarship in History	This will be developed in specialised discussions with the supervisor about the student's research field and assessed via the production of a short summary of current research in the field as part of the portfolio on the Research Project Portfolio module (MHCA4002). This will then be applied to assignment two of the IHCA 'Research Approaches in the Humanities and Creative Arts' module (MHCA4001), which is an essay on appropriate philosophical or theoretical paradigms.
2. identify research techniques, methods, tools, approaches, or theories appropriate to their own research in History	This will be initiated and assessed on RTP405. Thereafter, a fully comprehensive survey will be undertaken on MHCA4001. The student's ability to apply research approaches to their own work will be developed and assessed through the two assignments: a presentation on methodology; and an essay on appropriate philosophical or theoretical paradigms.

3. synthesise complex arguments and ideas and communicate those clearly to both specialist and non-specialist audiences	While all these will be tested through written work, the key transferrable skill of communicating complex ideas to a non-specialist audience will be developed and tested on the UW-wide RTP and the Institute-wide MHCA4001. On both, the student will have to present their ideas to their peers in other disciplines.
4. demonstrate practical skills in project management including time management, contingency planning, self-reflection, constructive liaison with a supervisor and (where appropriate) outside agencies.	Project management skills are embedded into the curriculum and assessment on RTP405. More specific elements in relation to the student's own project (e.g. production of a project schedule such as a GANTT chart and working with a tutor and, possibly, outside agencies) will also be central to MHCA4002. Interactive group skills will be developed in those modules – RTP405 and MHCA4001 – shared with other students.
5. demonstrate skills in data collection and analysis, including digitised or online resources	These will be developed on RTP405 and digital research skills will be assessed, specifically, in the research requirements of the assignment for MHCA4002.
6. demonstrate a sense of the professional context of their field through an understanding of external agencies	This will principally be assessed on MHCA4002 as part of the portfolio assignment and will be assessed formatively through work with the supervisor and in supporting the subject area's research activities.
MRes	
7. apply a comprehensive knowledge and understanding of, and ability to critique, existing theories and debates in History towards their own interpretations of existing subject matter and/or the introduction of new material or perspectives	These insights will be developed through the programme of research developed on MHCA4002, that module's assignment, and the essay on philosophical or theoretical paradigms on MHCA4001. They will also be developed through MHCA4005 and through the support of a subject expert as the student's supervisor.
8. apply techniques, methods, tools, approaches, or theories in History towards completing a substantial research project	Founded upon the teaching and analysis of methods on RTP405 and MHCA4001 this will be developed with the support of an expert supervisor and implemented in the application of methods to original research on MHCA4005
9. demonstrate the capacity to adopt a critically-informed reflective and reflexive approach to theoretical models and subject knowledge in History, and the application of these to their own scholarly writing	This will begin with assessment of the student's own strengths and weaknesses on the modules RTP405 and MHCA4002. It will be formatively assessed on the draft plan on MHCA4005 and will be assessed closely on the eventual, completed research project.
10. exercise initiative, personal responsibility, and independent	Elements connected to decision-making (e.g. selecting appropriate

intellectual judgement with regard to complex subject matter.	methodologies or theories) will occur on all modules. The exercise of personal responsibility and initiative towards the student drawing their own conclusions will be developed and appraised on MHCA4002 – e.g. as students develop a plan and identify training and development needs. These skills will then be applied and assessed
11. apply advanced skills in data collection and analysis – including, where appropriate, literature review skills, the use of digital, online or computerised databases, or archive material – towards completing a substantial research project.	Embedded on MHCA4002 in particular, the further cultivation of these skills will occur with tutorial support and internal or external training (e.g. the Research School’s Researcher Development Programme). Their application towards comprehensive, knowledgeable and original analysis will be assessed on MHCA4005.
12. construct in writing comprehensive, informed, current, complex, and intellectually coherent arguments in History	This outcome will be developed through supervision and assessment on both the MHCA4002 assignment and the assignments on MHCA4001. These arguments will be tested via supervision on MHCA4005 and the production of a research project plan that will include a hypothesis section. Success will be appraised via a grade given for the research project.

14. Assessment Strategy

In line with the University of Worcester’s Assessment Policy, the assessment strategy on the MRes has been designed to help ensure that our students meet the learning outcomes for the course thereby graduating successfully. Assessments have been linked towards facilitating the development of the skills this MRes is designed to foster, whether the academic skills of knowledge and methodological application, the intellectual cognitive skills required for a future academic career (e.g. doctoral study), or transferrable skills applicable to the workplace (e.g. developing digital literacy, techniques of data collection, or skills in project design, management and execution). While our assessment strategy does seek to offer students a variety of challenges appropriate to Master’s level study, that variety is also intended to help develop the broad, rounded skills that the MRes is designed to develop.

Consequently, the assessments on this course encompass in-class presentations, an extended research project, individual essays – designed to develop and assess discrete components of Masters level research e.g. theoretical paradigms – and, on MHCA4002, a portfolio that elicits self-reflection on research planning, literature search, and data collection. Because of the MRes’ developmental nature, formative assessment is also central. This will include, most notably, the production of a development plan on RTP405 and a later plan on MHCA4005 (around which students will receive detailed feedback from their supervisors). It will also include peer group feedback on class presentations on RTP405 and MHCA4001. This significant, formative dimension will, lastly, encompass elements on some of the summative assignments e.g. on modules such as RTP405 and MHCA4002 that are specifically designed to foster skills to be developed afterwards on MHCA4001 and MHCA4005. We have designed an assessment strategy in which separate components (the development of subject expertise and theoretical sophistication, project design, methodology, and data collection and analysis) are

augmented across modules towards the successful completion of the MRes. For example, research project design, as assessed on RTP405, will be refined and formatively assessed on MHCA4002, further to execution and assessment of the finished article on MHCA4005.

A full outline of assessment methods and weightings, mapped against learning outcomes, grade criteria, and assessment dates will be published in the MRes course handbook with further, specific details included in module guides. In order, further, to meet the developmental aspects of the MRes, the course team are committed to a policy of timely and consistent feedback.

In line with the University of Worcester Assessment Policy, assessments for individual modules are designed, as stated above, to enable students to demonstrate that they have successfully met the learning outcomes for the course. The particular learning outcomes being assessed are specified in each assignment brief. How these combine across the course is mapped via a grid in the course handbook. The course team has developed course specific assessment criteria (also published in the handbook). These ensure that assessment on the course is carried out consistently across the modules though criteria are customised for specific assignments as and when this is necessary (e.g. in the 'Portfolio' assignment on MHCA4002). These criteria are benchmarked to the University generic grade descriptors.

15. Programme structures and requirements

The Programme consists of:

60 credits at Level 7 (PG Cert Research Methods in History); a
120 credit 'Research Project' at Level 7 (MRes in History)

The award map for the MRes in History is as follows:

Course Title: MRes in History				
Module Code	Module Title	Credits	Status – Mandatory (M); Optional (O)	
			MRes Design	PG Cert Design
RTP405	Developing & Managing Your Research	15	M	M
MHCA4001	Research Approaches in the Humanities and Arts	30	M	M
MHCA4002	Thesis Preparation Module	15	M	M
MHCA4005	MRes Research Project	120	M	N/A

Students registered on the PG Cert History must successfully complete 60 credits at Level 7 (RTP405, MHCA4001, MHCA4002).

To be awarded an MRes in History students must successfully complete a total of 180 credits at Level 7 including a minimum of 120 credits for MHCA4005.

NB: Although MRes students will only formally progress to MHCA4005 after successful completion of the PG Cert level modules, we expect that they will have made substantial progress towards their research project in passing the assignments on MHCA4002 and through developing and refining theoretical paradigms on Part II of MHCA4001. The standard full-time structure for this course will be: RTP405 and MHCA4002 (semester 1); MHCA4001 (semester 1 and 2); MHCA4005 (semester 3).

16. QAA and Professional Academic Standards and Quality

There is no QAA benchmarking statement for an MRes in History. The academic level of the course – embedded in the course content, learning outcomes, and assessment strategy – has been established via the generic Masters level descriptor published in *The Framework for Higher Education Qualifications in England, Wales and Northern Ireland* (FHEQ) and the [QAA Master's Degree Characteristics \(2020\)](#) in Section A of the UK Quality Code for Higher Education.

The QAA 'descriptors' and 'characteristics' inform the 'apprenticeship' model that underlies this MRes. These apply as follows:

- through supervision by established national or international experts in the student's field, the course will:
 - provide an in-depth and advance knowledge of the student's research that will be 'at, or informed by, the forefront of an academic or professional discipline' ('FHEQ Descriptors')
 - enable students both to conduct a research project and undertake training in those research methods or approaches pertinent to History. This includes foregrounding contemporary issues e.g. how digital tools can extend 'research methods' in History and, potentially, enhance its modes of enquiry.
 - nurture students to be critical and original thinkers, autonomous, independent learners, and self-reflexive researchers and writers
- combined methods of teaching and learning and a diverse assessment strategy. Assessment 'specific to the individual' and that 'requires a dissertation or research project' will be preceded by taught content modules that will include research methods training.
- embedding a clear, potential line of development from undergraduate study to an academic career. This conforms to the description that 'Research master's degrees usually aim to prepare students for the next stage in a research career, whether pursuing a further research programme or entering research-based employment' (QAA 'Masters Characteristics Statement')
- 180 credits

This award is located at level 7 of the FHEQ.

17. Support for students

The following activities, resources and documents will support MRes students in History:

- Induction programme
- Course handbook and module guides
- Talis Aspire reading and resource lists for each module and support from ILS staff during induction and throughout the course (e.g. via the Information Desk)
- Student Representation on the IHCA MRes Programme Committee addressing course-wide issues
- A range of support services, including the accommodation office, provided through Student Services (Firstpoint). See <http://www.worcester.ac.uk/student-services/index.htm>
- English language support provision (where necessary) including writing support from the Royal Literary Fund Writers in Residence and, for international and EU students, from the Language Centre.

- The Disability and Dyslexia service offer a range of support and advice for students with particular needs. See <https://www2.worc.ac.uk/disabilityanddyslexia/>
- The electronic learning and teaching interface Blackboard is our primary medium for offering support material. Both the course and individual modules will have a Blackboard page. Here students will be able to access a range of material which may include: module guides, Talis Aspire resource lists; digital copies of academic material; PowerPoint lectures; teaching notes; module information and announcements; skills advice relevant to specific modules; audio-visual material; links to relevant resources available on the internet.

In addition to the above, students on the MRes in History will be assigned a supervisor at the start of the course. That supervisor will also be the student's personal academic tutor. The supervisor will be a nationally or internationally acknowledged expert in a field relating to the student's project. Supervisory input on, in particular, MHCA4002 and MHCA4005 will help ensure that the student has the opportunity to acquire the fundamental Masters level skills described above e.g. knowledge at the 'forefront' of her/his field; the ability to plan and execute a research project; methodological skills. The supervisor will provide general advice by undertaking regular progress reviews during the personal development plan and research project stages of the programme. Written records will normally be kept for all meetings. Students will likewise be supported by experts across the university and IHCA towards acquiring research methods, approaches or theoretical skills and knowledge e.g. on RTP405, MHCA4001, and through the Research School's Researcher Development programme.

18. Admissions

Admissions policy

The MRes in History is conceived as part of a development from undergraduate study to doctoral study and a potential career in academic research or towards equivalent, research-based employment. The course seeks to attract external applicants and is advertised via mail outs to university History departments in the UK and postgraduate resource lists such as Hobsons' *The Good Universities Guide to Postgraduate Courses* and Postgraduatesearch.com. It is, likewise, aimed towards existing University of Worcester undergraduates who wish to pursue research interests first developed on their degree. In this way, the MRes meets the aspiration of the University of Worcester's strategic plan to 'inspire our students to reach their full potential'. We are, in other ways, committed to widening participation and access to higher, postgraduate education (as consistent with UW's Admissions Policy) and will work closely with Student Services, the Research School, the Disability and Dyslexia Service etc, to support applications from students from a variety of backgrounds. We will continue that support as and when they enter the course. All research and expertise in the History subject area has an international dimension and international students are welcome to apply. The PGCert in Research might also be used to support the broader developmental needs of new staff/early career researchers.

Entry requirements

Applicants are normally expected to have:

- (a) a First or Second Class Honours (2:1) Degree, or equivalent award, in History or a related subject, and/or,
- (b) appropriate research or professional experience, which can be verified by evidence of achievement. This includes, for example, research related experience in a government organisation, NGO, charitable trust, historical society, or heritage organisation.

International applicants will be required to demonstrate comparable prior subject experience and to have an appropriate level of written and spoken English (normally an IELTS score of 6.5 with a minimum score of 6 in written English). Entry qualifications for international students are guided by the National Academic Recognition Information Centre's (NARIC) advice on international qualifications.

See [Admissions Policy](#) for other acceptable qualifications.

Recognition of Prior Learning

Students with relevant previous study at postgraduate level or with extensive experience may be considered eligible for recognition of prior learning. Please contact the Registry Admissions Office for further information or guidance on 01905 855111.

Further information on Recognition of Prior Learning can be found at <http://www.worcester.ac.uk/registryservices/941.htm>

Admissions procedures

Students would normally discuss their research interests and potential research project with potential supervisors and/or the course leader prior to submitting an application. This will help establish, for both parties, that our staff have the necessary expertise to supervise the proposal and to identify whether the intended research project would require additional, available resources. Those discussions could be instigated at undergraduate level (e.g. for existing UW students), via enquiries to course leaders, or through information offered at the University's postgraduate 'Visit Days'. Potential students are strongly advised to attend the latter.

All applications are submitted to the Research School and passed to the Course Leader for initial consideration. In the application form applicants are required to outline a research proposal for their intended project. Applications are assessed, both on the selection criteria below and in terms of the correlation between the proposed project, the students' prior experience and achievement, and the availability of necessary supervisory expertise. An Admissions Profile for the MRes will be available on the website, in the University's Prospectus, and on other marketing material. Additional selection criteria will be made clear prior to an interview. Where an applicant can clearly demonstrate that they meet these criteria (e.g. an existing UW graduate may have produced a relevant independent study for which s/he has attained a First Class grade) offers may, exceptionally, be made without interview. More commonly, where the application has potential, an interview will be scheduled with a panel comprising two members of academic staff (as specified as an indicator of academic quality in *Chapter B11: 'Research Degrees' of the UK Quality Code for Higher Education*) one of whom should be the potential supervisor. Completion of an interview checklist will allow for a rigorous and measurable evaluation of the candidate's strengths and their suitability for the programme.

International applications will, initially, be checked by the Research School Manager against NARIC. Copies of all certificates will be required before an unconditional offer can be made to the student. If the application has potential, the interview procedure detailed above will be followed, with the interview conducted via (e.g.) Skype.

Admissions/selection criteria

The admission of any individual applicant to the course is judged by the proposed supervisor in conjunction with the course leader who acts as admissions tutor. Those judgements may be supported, as appropriate, by other members of the History subject area (e.g. via interview), the Research School, and the International Office, Student Services etc. Where an offer is made, details of the offer and conditions are passed back to the Research School where a comprehensive offer letter and contract are produced.

For international students, the information and offer conditions are passed to the relevant personnel in Student Services who can also provide the student with additional support and guidance (for example, to obtain a visa, accommodation etc). All international applicants are checked for their competency in English language by the Language Centre. When it is felt that the applicant does not possess the appropriate level of English language, an in house English language course may be recommended before the student embarks on the MRes.

An offer of a place on the MRes in History will be made when the following conditions are satisfied:

- The applicant meets the specified entry requirements.
- The Institute has the supervisory capacity and expertise to support the research project outlined in the application form.
- The proposal outlined has the potential to become a viable research project both at Masters level (i.e. in accordance with QAA descriptors) and with regard to the context of the History subject area/IHCA's existing research expertise and strategic priorities.

19. Regulation of assessment

The course operates under the University's Taught Courses Regulatory Framework

Requirements to pass modules

- Modules are assessed using a variety of assessment activities which are detailed in the module specifications.
- The minimum pass mark is D- for each module.
- Students are required to submit all items of assessment in order to pass a module, and in some modules, a pass mark in each item of assessment may be required.
- Full details of the assessment requirements for a module, including the assessment criteria, are published in the module outline.
- Students are required to pass the three taught modules (RTP405, MHCA4001 and MHCA4002) in order to progress to the thesis stage of the programme (MHCA4005).

Submission of assessment items

- Students who submit course work late but within 7 days (one week) of the due date will have work marked, but the grade will be capped at D- unless an application for mitigating circumstances is accepted.
- Students who submit work later than 7 days (one week) of the due date will not have work marked unless they have submitted a valid claim of mitigating circumstances.
- For full details of submission regulations please see the Taught Courses Regulatory Framework.

Retrieval of failure

- Students are entitled to resit failed assessment items for any module that is awarded a fail grade.
- Reassessment items that are passed are capped at D-.
- If a student is unsuccessful in the reassessment, they have the right to retake the module (or, in some circumstances, take an alternative module); the module grade for a re-taken module is capped at D-.
- A student who fails 60 credits or more after exhausting all reassessment opportunities may be required to withdraw from the University.
- A student will be notified of the reassessment opportunities in the results notification issued via the secure student portal (SOLE). It is the student's responsibility to be aware of and comply with any reassessments.

Requirements for Awards

Award	Requirement
PG Cert	Passed a minimum of 60 credits at level 7, as specified on the award map
Masters (MRes)	Passed a minimum of 180 credits at level 7 including 120 credits for the Research Project module, as specified on the award map

PG Cert is unclassified. The award of Masters (MRes) may be made with Pass, Merit or Distinction.

The MRes in History has a substantial research component, assessed by means of a written research project. This enables the student to meet the learning outcomes of the course notably by demonstrating current knowledge at the forefront of their field of theatre and performance, ability to instigate, plan and execute a research project, and skills in research and methodology. Detailed guidance can be found in MHCA4005 guide.

20. Graduate destinations, employability and links with employers

Graduate destinations

The MRes offers students progression from undergraduate study to a potential academic career. The progression route on the course embeds fundamental research skills (e.g. on the taught modules) which – then applied in the supervisor supported, but independent research project – would facilitate a clear pathway into PhD study. The MRes may well, furthermore, bestow credits towards a PhD. Conversely, those skills would aid progression into equivalent research-based employment. This might include, for example, working for government departments, NGOs, charitable trusts, historical societies, or heritage organisations. More generally, the MRes would help prepare students for work in the context of a growing need amongst large corporations for literate and research trained staff while the development of skills in areas such as deploying research methods and tools (including digital resources), working with public providers, project management, or preparing funding applications could be applied to a wide range of jobs in the ever-expanding information economy.

Student employability

This course helps students develop both intellectual and technical competencies in research. It will prepare students for academic careers by replicating the fundamental components of academic research: developing a topic, literature review, method and analysis, and the planning and execution of a substantial piece of written research. Through the ‘apprenticeship’ model, which closely integrates the student’s work into the research culture of the History subject area, the MRes will also provide valuable experience of contributing to and working within a community of scholars. This will include training and experience in particular tasks beyond the MRes. Possible examples might encompass assisting in work on public engagement and impact case studies (and therefore in the broader non-academic community) or background research or sourcing material (e.g. to support ongoing staff research or the development of funding bids).

Preparation for employment is, likewise, a central component of our assessment strategy. The strategy offers transferrable skills replicating a variety of skills and tasks required for both academic careers and other, research-related or equivalent employment. Examples of how coursework relates to tasks within employment include: data search and literature review (surveys, measuring impact, acquiring data or information from digital sources (e.g. online archives)); in-class presentations (presentations to stakeholders, potential clients, schools groups, members of the public, etc); methodology (tools and skills for analysing

and presenting data); personal development plan (project management; formulating policy, strategy etc, commissioning reports); and production of the research project (writing strategic policy documents, annual reports, reports on organisational activities, etc).

Further support for students seeking employment will be available via the Research School's *Student Researcher Development Programme*. This provides workshops in, amongst many other things, oral presentations, public engagement, writing CVs, bid writing, and entrepreneurial opportunities.

Links with employers

Research in History is connected with a number of national and local historical or community associations and groups. Depending on the student's specific research project, the MRes could afford opportunities to work with those organisations and to acquire both subject-relevant work experience and experience in engaging our research with the wider community. Such organisations include the Commandery Museum in Worcester, The Infirmary (Worcester), national and regional BBC, the Worcestershire Archives and Archaeology Service, the Worcestershire Historical Society, and many local community groups and museums.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in associated course documentation e.g. course handbooks, module outlines and module specifications.
