

RECORDS AND DOCUMENT RETENTION SCHEDULE

Purpose and Scope

The Records and Document Retention Schedule describes the time periods for which records should be retained by the University in order to comply with operational and legal requirements, including data protection legislation.

The Retention Schedule relates to both paper and electronic records (hard and soft copies).

Please note that the default action to be taken at the end of the retention period is the secure destruction or deletion of the record. For hard copy records classed as Personal/Confidential or Highly Sensitive please use the University's Confidential Waste Collection Service. Details are available from Facilities.

Only one copy of each record needs to be kept for the full length of the retention period. Duplicate and secondary copies should be destroyed as soon as they are no longer of immediate operational use.

Emails that constitute a record which needs to be retained, including those containing personal data, must be stored in an appropriate filing system relevant to their confidentiality or criticality on the individual's N drive, O drive or Onedrive. Please see the [Information Classification and Handling webpage](#) for more information.

Definitions

Archival value	Some records may have archival/historic value and should be retained. The University has a long term storage facility which can be used for archive records. Please contact infoassurance@worc.ac.uk
Review	For some records deletion/destruction at the end of a specific period needs to be carefully considered especially if there may be archival/historic value to the record. Once a review has been undertaken if there is no merit in retaining the record it should be deleted or if it is retained a future review date should be noted.
While current	These records will relate to personal data which is dependent on an individual's consent being obtained. The accuracy of the records should be checked on at least an annual basis and consent re-obtained for processing.
Year Created +	In the example Year created + 5 – if the record was created in 2015/16 then it is due for deletion/destruction in 2020/21.

The Retention Schedule is informed by legal requirements and the recommendations of the Records Retention Schedule for HE compiled by [JISC](#)
